SUMMARY

BCA graduate passionate about web development and software engineering, with practical knowledge of HTML, CSS, JavaScript, Python, and SQL. Experienced in developing academic and personal projects that demonstrate problem-solving and application development skills. Eager to begin a career as a Full Stack Developer, contribute to innovative projects, and expand technical expertise in a collaborative work environment.

SKILLS

- **Technical:** HTML5 , CSS3 , JavaScript , React.js , Node.js , Python , Git , GitHub , SQL
- **Tools :** Vishual Studio Code , GitHub Desktop
- **SoftSkills :** Adaptability, Problem Solving , Teamwork, Time Management

PROJECTS

Cartify - Ecommerce website || <https://mahalakshmiesakkimuthu.github.io/Cartify-Website/>

- Developed and deployed a responsive e-commerce website (Cartify) using HTML, CSS, and JavaScript, featuring product categories, shopping cart, wishlist, search functionality, and a mobile-friendly UI.
- Implemented dynamic client-side functionality with JavaScript and browser local storage for cart and wishlist management, and deployed the project using GitHub Pages with Git for version control.

TaskNova – Task Management Web Application || [Live demo](#)

- Built a responsive task management web application using HTML, CSS, and JavaScript.
- Implemented add, complete, and delete task functionality.Used LocalStorage to save tasks across page refreshes.Designed a clean and user-friendly interface.

SkyScope – Weather Forecast Dashboard | React.js, JavaScript, CSS, REST API || [liveDemo](#)

- Built a responsive weather application using React.js with real-time API integration.
- Implemented city-based search, current weather, hourly/daily forecasts, humidity, wind, and air-quality information.
- Utilized React Hooks, reusable components, and responsive CSS for dynamic and mobile-friendly UI.

Foot pressure based doorbell for physically challenged people

- Developed a foot-operated doorbell system that enables physically challenged individuals to ring a doorbell by pressing a pressure-sensitive mat with their foot.

EDUCATION

Bachelor of Computer Application

June 2023-April 2026

Bishop Heber College ,Tiruchirappalli

CGPA:8.28

CERTIFICATIONS

Application Developer (6 Months) – PMKVY (Govt. of India)

- Completed six months of certified training in HTML, CSS, JavaScript and Python.
- Worked on basic application development tasks and programming exercises.

Data Analytics Intern – Digidara Technologies

Sep 2025

- Analyzed datasets and generated visual reports using Excel, Power BI, SQL and Python.Used Excel, Power BI, and Python for data handling.Designed dashboards in Excel and Power BI for reporting and analysis.

Python Intern – IAFC

- Learned and practiced Python programming fundamentals. Wrote Python programs using variables, loops, functions, and conditional statements.

Frontend Development Intern – IAFC

May 2025- June 2025

- Implement structured layouts and consistent styling for web pages.Ensured responsive design and usability across different devices.
